EDUCATION

B.S. Computer Science, State University -- Expected May 2026

SKILLS

Python, FastAPI, SQL, Git, JavaScript, REST APIs, Pytest, Docker (basic)

PROJECTS

RAG-Powered Study Assistant (personal project)

- Built a retrieval-augmented generation app using Python and FastAPI to answer questions over lecture notes stored in a vector database.
- Wrote REST API endpoints and unit tests with pytest; used Git for version control.

Campus Event Tracker (course project)

- Designed a REST API with FastAPI and SQL (PostgreSQL) backing store for a university club events platform.
- Collaborated with a 3-person team using Git branches and pull request reviews.

EXPERIENCE

Teaching Assistant, Intro to Programming -- State University (Aug 2024 - Present)

- Debugged student code in Python, held office hours, graded assignments.

ACTIVITIES

Member, Computer Science Club -- organized two hackathons.
